

MATEO ROCA

Hello, I am delighted to announce that I recently graduated as a **Systems Analyst**. In addition, I have more than two years of experience as a **full stack developer**. During my training and work experience, I have acquired solid knowledge in various programming languages and concepts that transcend a specific technology. This foundation has allowed me to comprehensively understand the logic and fundamentals of **systems development**. One of my strengths is my ability to learn quickly and effectively. Currently, my goal is to find a new work environment that allows me to continue growing professionally, facing new challenges and contributing my knowledge and skills in a significant way.

If you want to know more about my projects, I invite you to visit my website by scanning the QR code in the lower corner.

Work experience

mar 2022 - Act **Full Stack Developer** 

Activity Consultoria SAS

I worked on different projects where tasks were developed, both front end using technologies such as react.js and next.js, and the Back-end using mainly typescript with the nest.js framework.

I also participated in projects that involved the design and management of relational databases.

I implement CI/CD pipelines using GitHub Actions, for code management and collaboration, I use GitHub.

In some of these projects, Docker was used to create consistent development environments and portable deployments, and AWS for the infrastructure.

Mar 2024 - Act **Freelance Developer - AI Trainer (Remote)**

Outlier

Working with artificial intelligence (AI) models, My goal is to help them improve their programming skills. I provide code examples and feedback to guide your development.

Dec 2021 - Feb 2022 **Technical support** 

QR eventos

In this seasonal job, what I mainly did was configure the devices, computers and printers. Also solving problems with charging and selling devices.

STUDIES

Mar 2021 -
dec 2023

Systems Analyst Technician

[INSFT N°151, Mar del Plata](#)

Some of the subjects and topics he studied: algorithms and data structures, programming, software design, operating systems, databases, English, statistics, mathematics, algebra, agile methodologies, networks and communications, computer security.

Mar 2021

Learn Node.js and Express

[freecodecamp](#)

back-end web development basics, asynchronous JavaScript, npm, Node.js modules, JSON, HTTP

Apr 2022

Blockchain Basics Cryptocurrencies and NFT Tokens

[freecodecamp](#)

key elements of Blockchain technology: Bitcoin, Ethereum, Smart Contracts, NFT Tokens

Jul 2022

Learn React From zero

[freecodecamp](#)

Learn the fundamentals of React in this course from scratch. You will create four projects step by step and learn the fundamentals to start creating interactive web applications with React.

sept 2021

NestJs Course for Beginners - Create a REST API

[freecodecamp](#)

Learn NestJs by building a CRUD REST API with end-to-end tests using modern web development techniques. NestJs is a rapidly growing node js framework that helps build scalable and maintainable backend applications. In this course, we build a bookmarks API from scratch using nestjs, docker, postgres, passport js, prisma, pactum and dotenv.

ABOUT ME

My hobbies are mainly spending time with friends, I like to surf, train calisthenics, do outdoor activities, I also really enjoy spending time with my pets.

On the other hand, I like to play video games and learn more about the world of software development.

I consider myself a sociable, patient, calm person who has emotional intelligence when it comes to interacting with other people.

I am also a person with creativity and initiative when it comes to solving or creating.
